

Abolishing the Rule of Thirds

Email Subject: The rule of thirds killed design and left it for dead

Note: Hi ----**person's name**--- did you know that the rule of thirds killed design and left it for dead? Yes, much like the microwave killed homemade cooking. My name is -----**your name**----- and I invite you to join a huge movement to shift the quality of art we create. I'm an artist that wants to help clean up the internet by abolishing the rule of thirds. It leads artists, like myself, down a dead end road. I've found something better and just as simple called **Dynamic Symmetry** which design techniques can be built upon. Not just any techniques, the same exact one's Da Vinci, Van Gogh, Rubens, Michelangelo, Degas, Bougureau, Picasso, and the other masters used to create their masterpieces. If you edit out, or remove your article/video which promotes the rule of thirds you will not only be helping the future of art, but you can earn a Free PDF book of "Canon of Design - Mastering Artistic Composition." Just contact Tavis Leaf Glover at www.ipoxstudios.com and he will send you a link to the book. Easy as that! He is giving me a Free PDF for helping with this amazing project. I truly hope you consider this chance to help artists of our time achieve the excellent compositions that the masters have before us. It's the secret key that they kept hidden which will unlock the power of visual communication. We need to share this info with all artists that want to create masterful works of art!

Thank you so much for your time!

----**your name and info**----
